

Ocean Swift Synthesis Shruti Box Free

Controls:

Midi: The midi channel the device will respond to when the Drone button is in the off position.

Gain: Overall loudness. This parameter is not stored with presets.

Drone: When turned off the device will respond to midi and play when you sustain a note. When turned on the device will play at all times. This parameter is not stored with presets.

Note Switches: These turn on and off each available note - in this case an octave on a C scale with an additional C note. Hold between two and four notes for the typical shruti tones.
